

PRESS RELEASE

18 April 2023

One year after its acquisition by Helexia, Cap Sud becomes Helexia Agri

Saint-Quentin-Fallavier, France, 18 April 2023.

Helexia, an international player in the energy transition and a subsidiary of Voltalia (Euronext Paris, ISIN code: FR0011995588), announced in April 2022 the acquisition of Cap Sud, a company specialised in the construction of agricultural buildings with photovoltaic rooftops. One year later, following its successful integration, Cap Sud took a new step and became Helexia Agri. Adrien Demont is appointed Managing Director of Helexia Agri.

Helexia Agri completes the offer of Helexia France, a player in the energy transition and the decarbonisation of industrial, tertiary and agricultural activities

Founded in 2006, Cap Sud –now **Helexia Agri**– is specialised in the development, construction and operation of photovoltaic power plants on the rooftops of barns. The company joined the Helexia Group in April 2022.

Active mainly with commercial and industrial clients, **Helexia France** also has experience in the agricultural sector with more than 200 plants in operation. The successful integration of Cap Sud and its team allows **Helexia France** to strengthen its offer for farmers by proposing the installation of agricultural barns with photovoltaic rooftops.

Helexia France and **Helexia Agri** are complementary and offer a range of expertise and global solutions to support their clients in their energy transition and the decarbonisation of their business.

Adrien Demont appointed Managing Director of Helexia Agri

A seasoned expert in photovoltaics, Adrien Demont is a former Helexian. He held the position of Photovoltaic Project Manager at Helexia France from 2015 to 2019, following

an entrepreneurial project –the company Activolt which he founded in 2006. He then continued his career as Head of the construction division within a competitor company.

"I am delighted to return to Helexia and put my expertise at the service of this significant project, which fits perfectly into the group's DNA. Cap Sud is one of the pioneers of agricultural photovoltaics. Thanks to the synergies between the two entities, Helexia Agri aims to become a key player in this fast-growing market", explains Adrien Demont, the new Managing Director of Helexia Agri.

"Adrien's arrival will accelerate Helexia Agri's growth in the agricultural market, after a successful integration phase. His extensive experience of the sector combined with the existing team's capabilities are valuable assets for developing the brand and accelerating the synergies with Helexia France", says Christophe Constant, Managing Director of Helexia France.

"I am very happy to have Adrien Demont back. Helexia France and Helexia Agri offer a complete and relevant support to all companies and organisations, whether they are tertiary, industrial or agricultural. In this competitive and growing market, supported by ambitious governmental objectives, this global expertise is a wonderful asset", adds Benjamin Simonis, Co-Founder, and CEO of Helexia Group.

About Helexia (<https://www.helexia.group/>)

Helexia is a historical player in the energy transition sector. Created in 2010, Helexia is a subsidiary of Voltalia (ISIN code Euronext Paris: FR0011995588). Helexia specialises in the energy performance of buildings and the production of photovoltaic energy on site (rooftops and solar carports).

With 380+ employees in 10 countries, Helexia has completed nearly 700 photovoltaic projects with a total capacity of 148 MW in operation. Helexia has supported its commercial, industrial, and agricultural clients in more than 180 energy efficiency projects. It provides continuous energy management for 1000 sites.

The wide range of services offered to its clients includes the definition of an energy strategy adapted to their needs, the design and execution of constructions, and the operation, management and maintenance of equipment and facilities to achieve their decarbonisation and energy consumption reduction objectives.
