

PRESS RELEASE

Helexia France strengthens its photovoltaic portfolio with the acquisition of 28MW

23 October 2024

Helexia, a subsidiary of Voltalia (Euronext Paris, ISIN code: FR0011995588) and an international player in the energy transition, announces the acquisition of a 28MW portfolio of agricultural rooftop photovoltaic power plants. This acquisition marks a significant expansion for Helexia in France, which now totals an installed capacity of 170MW.

This transaction will enable Helexia to strengthen its installed base and secure recurring income over the long term. It forms an integral part of the Group's asset management strategy and is in line with the company's strategic roadmap. The portfolio acquired includes 202 sites, representing an installed capacity of 28 MW.

This acquisition represents significant growth for Helexia in France, increasing its installed capacity by almost 20%, from 142MW to 170MW.

It complements the acquisition of a 36MW portfolio of agricultural rooftop photovoltaic plants¹, consolidating Helexia's position in the French renewable energy market.

This acquisition was completed with the support of Herbert Smith Freehills on the legal aspects and Greensolver on the technical aspects.

“The acquisition of these new sites is a key step for Helexia. This expansion demonstrates our ambition to play a key role in France's energy transition”.

— Benjamin Simonis, CEO of Helexia Group

“The increase of our PV portfolio in operation in France is an important milestone in our growth. It reflects our commitment to offering innovative and sustainable energy solutions, while consolidating our position in the French market”.

— Christophe Constant, Country Director of Helexia France

About d'Helexia (www.helexia.group)

Helexia is a major player in the energy transition sector. Created in 2010, Helexia, a subsidiary of Voltalia (ISIN Euronext Paris: FR0011995588), specialises in building energy performance and on-site photovoltaic energy production (on rooftops and solar carports). With more than 470 employees in 11 countries, Helexia has completed more than 1,785 PV projects, representing 386MW in operation. Helexia supports its commercial and industrial customers in various energy efficiency and energy management projects.

The wide range of services offered to its clients includes the definition of an energy strategy tailored to their needs, the design and execution of construction, as well as the operation, management and maintenance of equipment and installations to achieve decarbonisation and energy reduction targets.
